

Edig Leonardo

Full Stack (REACT + NodeJS) Developer

Lisboa, Portugal | +351 960211775 | ediigmelchior@gmail.com | [LinkedIn](#)
| [GitHub](#)

Senior Full Stack Developer with over 5 years of experience architecting and scaling enterprise-grade applications. Specializing in the JavaScript/TypeScript ecosystem (Node.js, React, Angular).

I focus on performance optimization, system design, and building robust APIs. Proven track record of delivering high-performing platforms and driving continuous integration within Agile environments

Experiência Profissional

Fullstack Developer & Mobile | Aubay (Cliente: Botelho & Rodrigues)

Jan 2025 – Present | Lisboa, Portugal

- **Code Management and Maintenance (Project: B&R Environment):** Cleaning and optimization of the existing codebase. Development and enhancement of multiple evolutionary versions (EVs). Resolution of complex technical problems through problem management (PM) tickets. Implementation of code improvements to increase performance and maintainability.
- **Frontend, Backend & Mobile Development:** Development of new endpoints (ExpressJS); creation of new web pages using **React**, **NextJS**, Redux, RxJS, NodeJs, ExpressJs, GraphQL, and PostgreSQL. Implementation of dynamic and responsive UIs with SCSS and MUI. maintaining persistence through PostgreSQL, GCP, Firestore, and Firebase.
- **Frontend Architecture (Project: B&R Track & Trace):** Developed new application routes to manage the delivery of all studs by drivers. Create responsive mobile solutions using **React Native**. Customize Firebase and Firestore for the persistence of the data.
- **Testing and Implementation (CI/CD):** Ensuring code quality and reliability through rigorous testing with Jest, Playwright, and Puppeteer.

Implementation in production using **Jenkins, GITLABCI, GCP (Cloud Storage, Firebase, Firestore), Terraform, AWS (ECS, ECR, Lambda)**. Documentation of workflows in Confluence and JIRA.

- *Technologies: **React**, **React Native**, **Redux**, **Node**, **Express Js**, **Typescript**, **GIT/GITLab**, **Docker**, **PostgreSQL**, **Microservices**, **RESTful API**, **Agile Methodologies (SCRUM)**, **GraphQL**.*
-

Fullstack Developer | KWAN (Client: SIBS)

February 2024–January 2025 | Lisbon, Portugal

- **Frontend Solution Development:** Responsible for developing new web interfaces for the SIBS Backoffice, using Angular, RxJS, Angular Material, and Bootstrap. Focus on creating dynamic and *responsive* user experiences.
- **Advanced Support and Optimization:** Provided L2 and L3 technical support. Executed refactoring (*codebase cleanup*) and code optimization tasks, addressing and resolving complex technical issues (management of *PM tickets*).
- **Architecture Implementation (SIBS ID):** Design and implementation of the *frontend* architecture using Angular, RxJS, and Angular Material. Security customization through the integration and adaptation of Keycloak (*Keycloakify*).
- **DevOps and Continuous Integration:** Implementation in production environments using the Jenkins tool, JASMINE. Creation and maintenance of technical documentation in Confluence and task management in JIRA, **JENKINS, AZURE, and AZURE PORTAL**.
- *Technologies: Angular, Angular Material, Node, Express Js, Typescript, Jira, Confluence, Docker, PostgreSQL, Azure Portal, Jenkins, Scrum, Git/GitLab.*

Frontend Developer | Capgemini Engineering (Clients: LBC Consulting and AMA)

December 2023 – February 2024 | Lisbon, Portugal

- **Frontend Migration and Modernization:** Led the migration of a legacy application, updating the codebase from Angular 13 to **ReactJS**. Design and implementation of a reusable UI component library to maximize efficiency.
- **Web Compliance and Accessibility:** Development of fully accessible and adaptable (*responsive*) web pages, focused on meeting the requirements for evaluation on government portals. Implementation of accessibility tests to ensure compliance with required standards.
- **Full-Stack Collaboration:** Active collaboration with the *backend* team in developing APIs using NestJS. Use of PostgreSQL, MySQL, Sequelize, and TypeORM for data management and persistence.
- **Technologies:** *React, NestJS, Redux, Angular, Node, ExpressJS, Typescript, Docker, PostgreSQL, MySQL, RESTful API, Agile Methodologies.*

FullStack Developer | MERN & MEAN DEVELOPER | Capgemini Engineering (Client: Talent Factory)

January 2023 – December 2023 | Lisbon, Portugal

- **Complete Web Development:** Participation in the design and development of *responsive* web applications in *frontend* technologies (**ReactJS**, VueJS, and Angular) and *backend* (NodeJS and ExpressJS) for *server-side* functionalities.
- **Infrastructure and Integration:** Configuration of development and production environments with **Kubernetes** and Docker for containerization. Building and integration with RESTful APIs. Execution of production *deployments* using Jenkins.
- **Technologies:** *React, VueJS, Angular, NodeJS, ExpressJS, Kubernetes, Docker, AZURE DEVOPS, DOCKER HUB, Jenkins, SQL,*

Tailwind CSS, GIT.

Full-Stack Developer (MEAN Developer) | UPSKILL (APPX Training Program)

March 2022 – January 2023 | Lisbon, Portugal

- **Web Application Development:** Creation and maintenance of web applications using a technology *stack* based on HTML, CSS, JavaScript, TypeScript, Angular, and **React**.
- **Server Logic and Databases:** Implementation of *server-side* logic using NodeJS, ExpressJS, and Drupal. Management and optimization of MySQL databases.
- **Methodologies and DevOps:** Configuration of environments with Docker and Kubernetes. Participation in all phases of the development cycle, following the Agile methodology (Scrum), *Docker, Kubernetes, and GitHub Actions*.
- *Technologies: Angular, React, Node, Express.js, MySQL, Docker, Kubernetes, GitHub Actions, Scrum.*

Backend Engineer / Python Developer | TOPCODER

January 2020 – March 2022 | Remote / Global

- **Backend Architecture and Migrations:** Responsible for the architecture and implementation of scalable *backend* solutions, using Python *frameworks* (Django and Flask). Management and execution of complex database migrations.
- **Data Engineering and ETL Pipelines:** Development of automation *scripts* for data acquisition (*web scraping*) and implementation of *data cleaning* and processing *pipelines* with the Pandas library.
- **Performance Optimization:** Optimization of SQL queries and implementation of *caching* strategies to ensure substantial reduction in system response times.
- *Technologies: Python (Django, Flask), Pandas, SQL, JavaScript, NodeJS, CSS, and technical SEO.*

Academic Education

BSc in Informatics Engineering | Universidade Aberta Mar 2026 – Present | Lisboa, Portugal

- *Currently studying core computer science concepts, including: Data Structures, System Architecture, Mathematics, and more.*

Web Development Technician | ISCTE Mar 2022 – Jan 2023 | Lisboa, Portugal

- Focused on full-stack web application development utilizing MERN (MongoDB, Express.js, React, Node.js) and MEAN (MongoDB, Express.js, Angular, Node.js) stacks.
- Covered end-to-end development, including database schema design, server-side logic implementation, and responsive user interface creation.

Integrated Master's Degree in Chemical Engineering | Instituto Superior Técnico Sep 2014 – Jul 2017 (Frozen)

- Developed a strong foundation in advanced statistics and analytical problem-solving.
- Gained proficiency in data processing and computational logic.

Technical Skills (Hard Skills)

- **Frontend:** React, React Native, Angular, HTML/CSS/JavaScript & TypeScript.
- **Backend (TypeScript):** ExpressJS, NestJS

- **Backend (Python):** Flask, Django
- **Backend (Java):** JBOSS, SpringBoot
- **Databases (SQL):** PostgreSQL, MySQL, MariaDB, SQLITE, Oracle, DB2
- **Databases (NoSQL):** MongoDB, Firestore, Redis, DynamoDB, CassandraDB
- **Cloud Platforms:** GCP, Azure, AWS (E2S, S3, ECS/EKS/Lambda/DynamoDB)
- **DevOps/CI/CD:** Docker, Kubernetes, Jenkins, Gitlab, BitBucket, GitHub Actions
- **Styling & UI:** Tailwind CSS, Styled Components, MUI, AMUI, ShadCn, Bootstrap
- **Monitoring & Observability:** Sentry, Grafana, Kibana, DataDog
- **Testing Frameworks:** Jest, Jasmine, Cypress, Vitest, Playwright
- **Architecture Patterns:** MicroService, Monolithic, Modular Monolithic, MVC, Hexagonal
- **Project Management:** Jira, Trello, Confluence (Scrum, Agile Methodologies)

Behavioral Skills (Soft Skills)

- Effective Communication and Collaboration
- Proactivity and Adaptability
- Problem Solving
- Results Orientation
- Rapid Learning

Language Proficiency

- **Portuguese:** Native
 - **English:** Fluent
 - **Spanish:** Intermediate
-

Courses and Certifications

- Angular 17+ Full Guide, Udemy (2024)
- Web Development with Python and Django, Udemy (2024)
- NextJS, Udemy (2024)
- Talent Factory For Web Developers, Capgemini Engineering (Jan 2023 - Mar 2023)
- Web Development, ISCTE - UPSKILL
